

RGT Planet

RGT PLANET
a new world

RGT Planet is a high yielding spring barley with a strong agronomic package and x-ceptional yield potential.

A GOOD ECONOMIC OPTION

RGT Planet has a strong agronomic package that, combined with its yield potential, will make it an economic option for Australian barley growers.

RGT Planet received full malt accreditation in Australia in March 2019. It already has malt status in many European countries and strong demand from European and Asian brewers.

RGT Planet has good disease resistance to mildew, rhincosporum, net blotch and brown rust. It also has good straw strength and reduced risk of lodging.

End Point Royalty
>\$4.40/tonne (excl. gst)

FEATURES

High yielding variety	Low protein, high hot water extract
Malt accredited in Australia and Europe	Strong interest from Asian brewers

BENEFITS

- Earlier planting opportunity
- Suited to malting
- Heineken green light
- Carlsberg approved
- Adaptable to early or late season finishes

SOWING RATES

50-80kg/ha

Mid Flowering

Australian Release >2017
