Are you an Australian farmer or retailer? Please be assured our mission is to minimise your risk and maximise your potential by supplying the best grain and forage varieties, seed quality, and customer service. You benefit from our unique combination of independence, flexibility, and a wide world of seeds through our Australian and international alliances. Importantly, you can trust AGF and the information in this guide because of our focus on evaluation, a long history in seed multiplication, in-house seed processing, a commitment to ethical marketing, and good people.

- Selected for and grown in Australia
- High early vigour and Winter feed production
- Late maturity allows for late season production
- Tested in Australia since 2017

## SOWING TIPS

Early sowing allows varieties to express their potential and achieve high growth rates during winter.

Sow at 25-30kg/ha alone or 5-15kg/ha when a component of a pasture blend.

Sow seed no deeper than 1cm into a fine but firm seed bed.

Sow into bared ground if direct drilling.

A light harrow and roll may help to improve germination.

Suitable for over sowing into an established stand.

Pasture productivity is directly related to successful plant establishment.
