

Epic Diploid Annual Ryegrass

Diploid mid-late maturing annual suited to a broad range of environments and systems. Bred in Australia for high seedling vigour, production through Winter, high tiller density and rust resistance.

Key Features

- Winter Feed
- Robust variety that can be set stocked or rotationally grazed
- Fine leaves and stems

Region

Broad adaptation in medium rainfall environments

Plant Characteristics

Medium erect plants with finer leaves and stems, and high tiller density.

Maturity

Robust mid-late maturity (+7-10 days)

Disease and Resistances

Bred to have improved rust resistance compared to previous diploids.

Animal Health

Epic is a nil endophyte variety

Key Uses

Epic is a robust variety that provides dense feed in medium inputs systems for sheep and beef. Very strong winter performance

Grazing

Epic is suited to a broad range of environments and may provide additional value over tetraploids where periods of dry are more likely and harder grazings more likely.

Mixes

Consider use of annual clovers companions to fix nitrogen and further improve feed quality. Can be used to oversow pastures
