

Gusto Diploid Italian Ryegrass

Mid-Late maturing Diploid Italian with excellent early season production and recovery from grazing. Gusto is a densely tillered upright variety providing a balance between optimising grazing and conserving for silage or hay. Low aftermath heading ensures quality feed continues to be produced while moisture is available.

Key Features

- Mid-late maturity
- Low aftermath heading
- Early Season Production
- Densely Tillered Diploid

Region

Gusto is best used where the late season quality of an Italian ryegrass can be utilised and the robustness of a densely tillered diploid provides management options throughout the season.

Plant Characteristics

A densely tillered upright variety with low aftermath heading.

Maturity

Mid-late maturity similar to traditional diploid Italian ryegrasses

Key Uses

Gusto has the potential to provide up to two seasons of high-quality grazing and silage or hay. Gusto provides excellent early season production and can recover for multiple grazings. Due to the low aftermath heading quality feed is ensured to be produced late in the season while moisture is available.

Grazing

Gusto provides excellent early season production and can recover from grazings quickly. It is best used with rotation grazing to get the best benefits from its ability to recover.

Disease and Resistances

Observed robust rust resistance in high pressure seasons.

Animal Health

Nil Endophyte
