

TRIPLE 2 WINTER WHEAT

- Incredibly High Yield Potential
- Wide Sowing Window
- Strong Disease Package
- Mid Maturity

Triple 2 is an awned, high yield potential, red-grained feed winter wheat, with a mid-maturity that is slightly slower than LRPB Beaufort.

Triple 2 has a strong disease resistance package with good Septoria and Stripe Rust resistance. It has shown strong resistance in nil and low fungicide trials proving the robustness of the genetics.

Triple 2 has a wider sowing window and will be complimentary to existing longer season winter wheats in sowing programs and suit medium & high rainfall zones.

DISEASE PACKAGE

Triple 2 has been rigorously monitored both in AGF Seeds and Independent Trials such as FAR and NVT and has shown a strong disease resistance package. Of note is the resistance Triple 2 has shown to Septoria and Stripe Rust.

In nil, and low fungicide trials Triple 2 has shown incredible resilience and offers growers flexibility in their spraying regime, allowing them to adjust to seasonal conditions.

Table 1: FAR GEN Trial, Wallendbeen, NSW, 2023: Influence of variety and fungicide management on disease infection (Septoria tritici blotch *STB) and stripe rust (Yr), assessed 24 October, 2023 during grain fill. (0 = good, 100 = bad)

Willaura	S	MRMS	S	SVS

YIELD POTENTIAL

Tested in a range of yield environments Triple 2 has consistently shown its potential to out yield its competitors.

Triple 2 maintains competitive yields in lower yield environments and when conditions allow has incredible high yield potential with 10t/h+ yields recorded in internal and independent trials.

In 2025 we pushed Triple 2 into additional regions to see how it performed from North-East NSW through to South-East South Australia

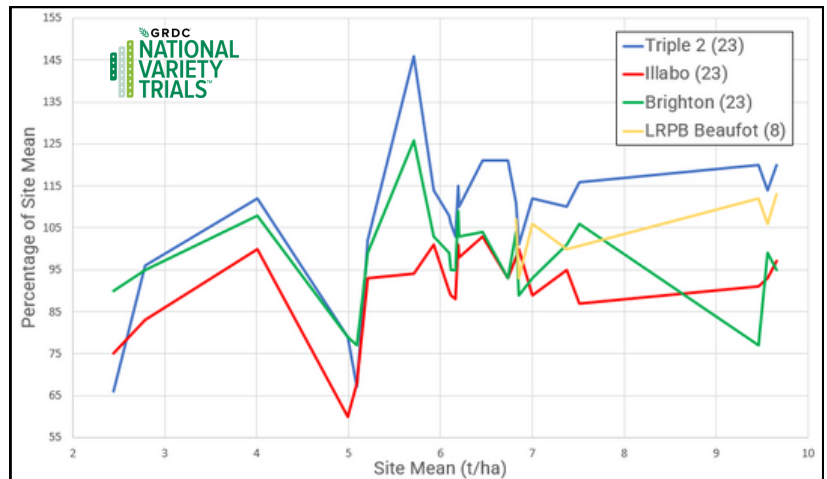

Table 4: Site Mean (t/ha) vs Percentage of Site Mean of all 2025 NVT Trial sites Triple 2 was entered into. Trials by Regions, 5 x NSW N/E, 10 x NSW S/E, 2 x Vic N/E, 5 x Vic S/W, 1 SA S/E. Source: [NVT Long-Term Yield Reporter](#)

Triple 2	9.96	9.92	9.72	10.13	9.66	9.49	9.91	9.29	8.29
Beaufort	8.75	8.99	9.28	9.9	9.49	8.99	10.14	9.42	8.3
Site Mean	9.39	8.93	7.94	9.53	8.51	6.33	8.78	7.41	4.3

MATURITY & REGIONALITY

Triple 2 is a mid maturity winter wheat and has a wider sowing window than later maturity winter wheats such as BigRed and RGT Accroc. With a maturity slightly slower (+4 to 8 days) than LRPB Beaufort, Triple 2 has greater adaptability in high and medium rainfall zones.

In high rainfall zones, Triple 2 can be sown in cropping programs as a complimentary variety to later maturity winter wheats (BigRed, RGT Accroc, Longford).

In medium rainfall zones, Triple 2 provides an earlier sowing option than main season spring wheats.
